- Web user interfaces
- Audiovisual production and editing
- CSS, HTML

Work History

2019-01 **Web Application Developer**

Current I-Tech jijel,jijel province

- My love to computers started in young age, i landed my first job as an IT in a local computers store
- I was learning python aside with my college study and my job for the past 3 years and that lead me to web app development
- I worked on small projects at my local town with small businesses such products management with Django and digital marketing for them
- I also did little projects on upwork as freelancer for customers around the world

- Along the way i maintained a basic knowledge about python desktop applications, GUI, scripting, auto browser, and web scraping
- Worked in both HTML and CSS environments, choosing each protocol, where appropriate, for best results.
- Remained abreast of developments in related Python frameworks, including Django and Falsk.
- Analyzed user requirement reports to design web applications to meet customer needs, as well as all legal and budgetary restrictions.
- examples of my work:
